

GRAVITY ANCHOR™

ASSEMBLY INSTRUCTIONS

ASSEMBLY INSTRUCTIONS

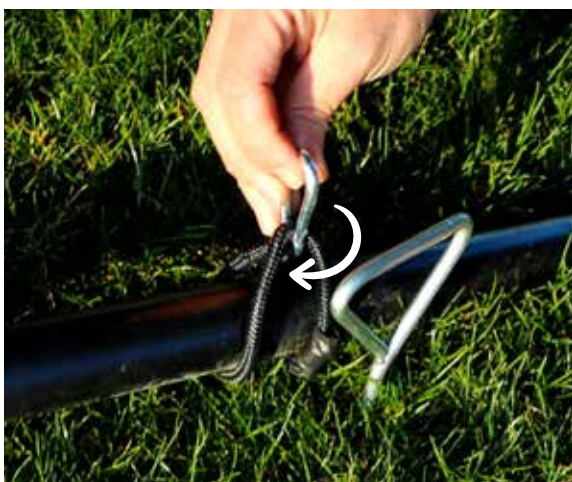

GRAVITYANCHOR™

STEP 1

Set the anchor adjacent to a trampoline foot, then press down and turn clockwise to puncture the ground. Continue turning until no coils remain visible.

STEP 3

Clip the carabiner around the other end of the strap, closing the loop.

STEP 2

Loop the anchor strap with carabiner around the base of the trampoline foot.

STEP 4

Clip the carabiner into the peg handle, securing the trampoline foot to the ground. Repeat on each trampoline foot until no pegs remain.

The Gravity Anchor™ is designed as a preventative measure against high winds. SpaceJump™ does not claim that the GravityAnchor™ will prevent any damage to your property or trampoline.

We always recommend to drop the safety net when strong winds are forecast. Refer to your SpaceJump™ owner's manual when extreme weather is forecast.
